SECTION 4 - FIRST AID MEASURES

4.1. Description of first aid measures

- General** In all cases of doubt, or when symptoms persist, seek medical attention.
Never give anything by mouth to an unconscious person.
- Inhalation** Remove to fresh air. If breathing is labored, administer oxygen. If breathing has stopped, administer artificial respiration and seek emergency medical assistance.
- Eyes** Irrigate copiously with clean water for at least 15 minutes, holding the eyelids apart and seek medical attention.
- Skin** Immediately flush with water for at least 15 minutes while removing contaminated clothing. Call a physician.
- Ingestion** Do not induce vomiting. Give a large quantity of milk or water. Do not give fluids to an unconscious person. Call a physician.

4.2. Most important symptoms and effects, both acute and delayed

Overview **Skin Contact:** Causes skin irritation. Not considered toxic by skin absorption but prolonged

exposure may result in absorption of harmful amounts.

Eye Contact: Causes severe eye irritation from solvents. Prolonged contact may cause permanent visual impairment.

Inhalation: Causes severe eye irritation from solvents. Prolonged contact may cause permanent visual impairment.

Ingestion: May cause gastrointestinal irritation or ulceration. May cause nausea, vomiting, or diarrhea.

Chronic Effects: Dermatitis, chemical pneumonia, central nervous system excitation, injury to bone marrow, blood, liver, kidneys, heart, testes, apprehensiveness, memory impairment, tingling of skin, tremors, impaired lung function, weakness, vertigo. May aggravate existing skin, eye, lung, kidney, liver, heart, blood, and nervous system conditions.

Primary Routes of Entry: Inhalation and skin

Exposure to solvent vapor concentrations from the component solvents in excess of the stated occupational exposure limits may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, nausea, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness.

Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in dryness, irritation and possible non-allergic contact dermatitis. Solvents may also be absorbed through the skin. Splashes of liquid in the eyes may cause irritation and soreness with possible reversible damage. See section 2 for further details.

Inhalation	Harmful if inhaled. May cause drowsiness or dizziness. May cause respiratory irritation.
Eyes	Causes serious eye irritation.
Skin	May cause an allergic skin reaction. Causes skin irritation.

SECTION 5 - FIRE-FIGHTING MEASURES

5.1. Extinguishing media

Dry chemical, carbon dioxide, water spray or regular foam.

5.2. Special hazards arising from the substance or mixture

Hazardous decomposition: Carbon monoxide, carbon dioxide, oxides of nitrogen and partly decomposed organic compounds

Keep away from heat / sparks / open flames / hot surfaces -No smoking.

Keep cool.

Ground / bond container and receiving equipment.

Use explosion-proof electrical / ventilating / light / equipment.

Use only non-sparking tools.

Take precautionary measures against static discharge.

Avoid breathing dust / fume / gas / mist / vapors / spray.

Do not get in eyes, on skin, or on clothing.

5.3. Advice for fire-fighters

Cool fire-exposed containers with water. When fire fighting, wear full protective equipment including self-contained breathing apparatus.

Heating may cause pressure to build up and possible rupture of the container. May produce hazardous fumes or hazardous decomposition products.

ERG Guide No. 128

SECTION 6 - ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Put on appropriate personal protective equipment (see section 8).

6.2. Environmental precautions

Do not allow spills to enter drains or waterways.

Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

6.3. Methods and material for containment and cleaning up

Remove ignition sources. Add dry material to absorb spill (if large spill, dike to contain). Using recommended protective and explosion-proof equipment, pick up and containerize for recovery or disposal. Flush area with water and collect for disposal.

SECTION 7 - HANDLING AND STORAGE

7.1. Precautions for safe handling

Ground and bond container when transferring.

Store in accordance with the National Fire Protection Association's publication NFPA 30, Flammable and Combustible Liquids Code. 29 CFR 1910.106 applies to the handling, storage, and use of flammable and combustible liquids.

See section 2 for further details. -[Prevention]:

7.2. Conditions for safe storage, including any incompatibilities

Handle containers carefully to prevent damage and spillage.

Incompatible materials: Acids and/or bases

Do not store or handle product in the presence of heat, sparks, or open flame.

See section 2 for further details. -[Storage]:

SECTION 11 - TOXICOLOGICAL INFORMATION

Acute toxicity

Exposure to solvent vapor concentrations from the component solvents in excess of the stated occupational exposure limits may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, nausea, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness.

Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in dryness, irritation and possible non-allergic contact dermatitis. Solvents may also be absorbed through the skin.

Splashes of liquid in the eyes may cause irritation and soreness with possible reversible damage.

2-butoxyethanol and its acetate are readily absorbed through the skin and will cause harmful effects on the blood.

Based upon animal testing, the C9 aromatic hydrocarbon components (trimethylbenzenes and ethylmethylbenzenes) are presumed to cause fetal toxicity and/or decreased fetal and newborn weights if overexposure occurs during the early gestation period.

FOR YOUR PROTECTION:

The continuing decay of our society brings you the following:

The following pertains to all of this manufactures products, including this one, and any paper upon which this may be printed:

California State Product Liability Warning (Business and Professions Code, Section 1714.45): This product is inherently unsafe. It cannot be made safe.

This was known as the “Willie Brown Law”, passed by him in his last days as Speaker of the California legislature, that exempted ordinary consumer products such as butter, eggs tobacco and any other consumer product that wished to be, from product liability suits in the State of California.

California State Health & Safety Code Section 25249.6: All paper products inherently contain detectable levels of formaldehyde. Therefore, under this Code Section and as required by law, it must be stated that detectable amounts of chemicals known to the State of California to cause cancer, birth defects or other reproductive harm may be found in the containers, paper labels or packing materials. This was the result of Proposition 65 in California, some decades back, that sought to define in law, regardless of scientific fact, anything having any hazard at all as having an equal hazard in any lesser concentration, and if it became invisible, it magically ceased to be hazardous at all; bad science, but a California State law ever since.
